

# POST FORMED SYSTEMS LTD

## OUR MATERIALS AND PROFILES

### FORMICA HIGH PRESSURE LAMINATES

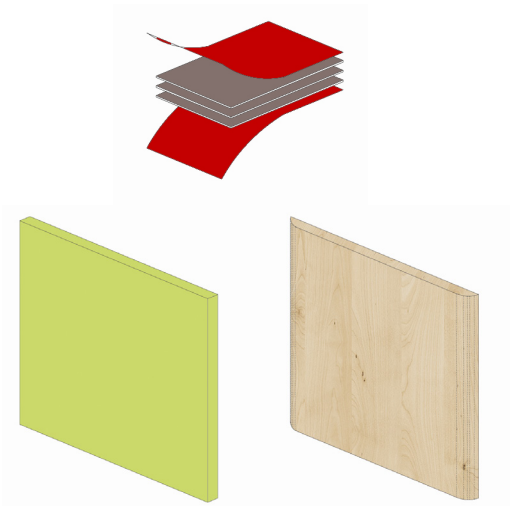

Formica® High Pressure Laminate (HPL) is manufactured through fusing multiple layers of impregnated paper under high pressure and temperature to create a hard wearing, durable and hygienic surfacing material.

#### SQUARE EDGED FINISH

Formica HPL bonded to a core board front and rear,  
Edges square lipped.  
Available in 20mm, 30mm, 44mm.  
Suitable for dry environments.

#### POST FORMED FINISH

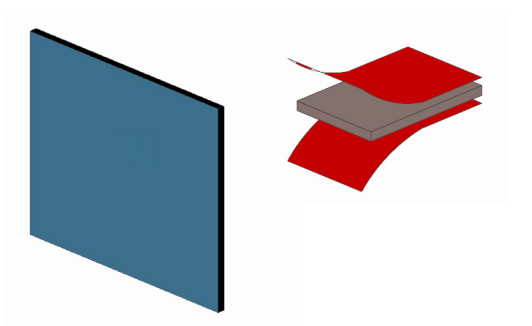

Formica HPL bonded to a core board front and rear,  
Edges with a post formed finish on sides, top and bottom square lipped.  
Available in 20mm, 30mm, 44mm.  
Suitable for dry environments.

### FORMICA COMPACT GRADE LAMINATES

Formica® Compact is a high pressure structural laminate, built up from multiple layers of kraft paper to produce a laminate in thickness 12mm and it has a decorative face on both sides.

Compact Laminate 12mm thickness solid core board with resin base having decorative surface finish to both sides.  
Edges are radiused finished and polished black.  
Ideal for areas of high moisture and high humidity.  
Available in 12mm.  
Suitable for wet and dry environments

### SOLID SURFACING CORIAN

Solid surfacing an intelligent composition of acrylic, natural minerals and pigments that come together to provide a smooth, non porous and visually seamless surface which meets the highest standards for aesthetics, functionality & hygiene.

#### CORIAN®

12mm Corian  
Seamless joints  
Suitable for wet and dry environments.
