

**Hygienic, durable and functional.**

With a focus on function and performance, the Formica® Washroom Collection is the ideal choice to create well designed changing rooms and commercial washrooms.

**Formica® laminates are highly versatile and can be used for most washroom styles and components:**

- Standard cubicles with visible fixings
- Premium cubicles, with clean lines and discreet internal fixings
- Shower cubicles
- Changing room cubicles
- IPS panels, cistern boxes and wall cladding
- Vanity units
- Benches and lockers

**The first and original**

Formica Group invented high pressure laminates in 1913. Pioneers by definition, our iconic Formica® brand represents the quintessence of laminates.

**Inspired by life**

Laminates entered people’s daily lives and made modernity dreams come true and accessible. Similarly, the demand for multifunctional, practical and durable designed surfaces is a constant inspiration for our Formica® Collections. At rest, at leisure, at work.

**Evolving with the times**

The way people live, work and play continuously changes. Formica Group keep pace with these evolving times through constant innovation, reflecting global trends and responding to ever changing needs and habits. The true original, still surfacing the world.

**Disclaimer**

**General**

The information provided by Formica Group (Formica) in this document is solely indicative. The information given in this brochure is correct at the time of publication. However, as we have a policy of constant product development and improvement, product specifications may change in the future. Visit [www.formica.com](http://www.formica.com), or [formica.info](http://formica.info) for technical data, as the most up-to-date source of information. Formica does not warrant that the information in this document is suitable for your specific purpose. Colour system notations represent the closest match available in the particular system. They may or may not be exact and are provided for guidance only. When exact colour information is required, please always refer to an actual laminate sample in the specified finish.

**Liability**

Formica is not liable (neither contractual nor non-contractual) for any damage arising from or related to the use of this document, except if and to the extent that such damage is the result of willful misconduct or gross negligence on the part of Formica and/or its management. The limitation of liability applies to all parties affiliated with Formica, including but not limited to its officers, directors, employees, affiliated enterprises, suppliers, distributors, agents, and representatives.

**General Conditions**

All sales of Formica® brand products are governed by the Formica General Terms and Conditions of Sale in effect at the time of sale and contained in every order acknowledgement and are available upon request.

**Intellectual Property**

# Formica® Washroom Collection

POST FORMED  
SYSTEMS LTD.

## Formica® Washroom Collection

● F5018 Spectrum Red

● F5374 Elegant Oak

Formica® laminates are highly durable, hygienic and easy to clean and maintain.

They provide longevity and service life benefits for demanding environments:

**Compact Grade Laminate**  
→ 12mm compact panels are self-supporting. They can be simply cut, drilled and installed.

**→ High impact durability**  
High resistance against vandalism and wear.

**→ Moisture resistant**  
Suitable for environments where humidity and moisture are a major factor, such as shower cubicles, changing rooms, gyms and swimming pools.

**High Pressure Laminate (HPL)**  
→ Thin HPL can be bonded to a substrate and edged, providing a cost effective cubicle and furniture solution for less harsh environments.

→ HPL can be postformed (heated to hold a curve) to create seamless curved details, reducing joints on vanity units, furniture and pilasters.

→ The surface of Formica laminate is non-porous and provides inherent scratch and stain resistance.

Flexible, accessible and comfortable.

Large Formica® laminate sheet sizes offer optimal design opportunities to create more accessible spaces for all, with greater built in privacy.

4300x1850mm and 3660x1525mm sheet sizes provide design flexibility and multiple cubicle components (doors, pilasters, partitions, IPS panels) can be taken from the same sheet/s.

In addition to the creation of standard elements, our large washroom sheet sizes support designs:

→ Where greater height is required, to increase privacy or to achieve a particular interior design feature.

→ Where greater width and/ or depth is required, to create more accessible layouts for disabled cubicles, changing rooms and shower cubicles and to increase comfort for occupants.

→ To accommodate different types of door fittings, hand rails, cubicle furniture and inward and outward opening doors.

## Formica® Washroom Collection supplied by Post Formed Systems

### Colors

F7949  
Soft White

F7927  
Folkestone

F7912  
Storm

F7837  
Graphite

F1485  
Chrome Yellow

F7879  
Dusty Jade

F7884

F1547  
Noir Cedar

### Sheets layouts\*

\*Woodgrain sheet layouts shown on this page are provided for guidance and represent a 3050x1300mm design area only

### Patterns

F8827  
Sarum Twill

\*Other Formica® Laminate decors are available alongside the Post Formed Systems promoted offer.

## Product grades, finish and accreditations.

This Collection incorporates the following grades of decorative laminate each with its own performance characteristics. This grade conforms to EN438.

### Formica® Laminate

Sheets (thin) consisting of layers of wood-based fibers impregnated with thermosetting resins and a surface decor on one side  
**Grade:** HPL/EN 438-3 HGP: Horizontal, General Purpose, Postforming high pressure decorative laminate  
**Thickness:** 0.7mm (nominal), single sided

### Formica® Compact

Sheets (thick) consisting of layers of wood-based fibers impregnated with thermosetting resins and surface decor on both sides  
**Grade:** HPL/EN 438-4 CGS: Compact, General Purpose, Standard high pressure decorative laminate  
**Thickness:** Double sided 12mm

#### General

The information given in this brochure is correct at the time of publication. However, as we have a policy of constant product development and improvement, product specifications may change in the future. Visit [www.formica.com](http://www.formica.com), or [formica.info](http://formica.info) for technical data, as the most up-to-date source of information. Not all certifications stated are applicable or available for all Formica® products. Please check that the product you require is covered by a relevant certification or is suitable for your specific application, in advance of order placement.

#### Colour system notations

NCS® and RAL Classic notations represent the closest match available in the particular system. They may or may not be exact and are provided for guidance only. NCS and RAL Classic notations provided have been established from a standard matt laminate sample. Please note that different surface finishes (texture structure and gloss levels) can have an effect on colour perception. When exact colour information is required, or for cross-material matching/HPL to other materials, please always refer to an actual laminate sample in the specified finish.

#### Light Reflectance Value

Light Reflectance Value (LRV) is a value indicating the proportion of light reflected by a colour, when measured under standard daylight conditions. This guidance uses a scale of 0-100, where 0 = black and therefore total light absorption, whereas white = 100 and therefore total light reflection. The main purpose of this value is to indicate measured colour contrast between two surfaces, which need to be readily distinguishable within an environment (under static conditions, a difference of 30 units between two colours is considered adequate). LRVs stated may or may not be exact and are provided for guidance only.

#### Please note

For non-solid colour decors, where there are multiple colours across the design, the stated LRV is an average value taken from multiple measurements across the décor and must be used with caution. The individual colours in a pattern, woodgrain or stone design can differ more than 30 LRV units within the design itself.
